

WATER

SOURCES AND THEIR USES

SOURCES OF WATER

RIVERS

Rivers are natural flowing water sources.

LAKES

Lakes are large areas filled with water.

DAMS

Dams store water in large amounts.

GROUNDWATER

Water found underground in wells and tube wells.

RAINWATER

Rain is a natural source of water.

IRRIGATION

River water is used to irrigate fields and grow crops.

DRINKING

Lake water is used for drinking after cleaning.

ELECTRICITY

Water stored in dams is used to generate electricity.

HOUSEHOLD USE

Groundwater is used for cooking, washing and other daily needs.

PLANTS & ANIMALS

Rainwater helps plants grow and supports animals.

SAVE WATER, SAVE LIFE
EVERY DROP COUNTS!
